## 1.1 About M800 Limited

M800 Limited, founded in 2007, headquartered in Hong Kong, China, with branches in Beijing and Shenzhen, is a global cloud communication technology service group. The founding team **has more than 40 years of professional background in the telecom industry;** it also founded Telecom 1616 Limited, developed it into the **world-renowned CITIC Telecom Holdings Limited**, and promoted the establishment of Hong Kong's **"second Internet hub"**. Besides, in 2006, CITIC Telecom International Holdings Limited (1883.HK) was successfully listed, raising more than HK$280 billion, during which the cumulative volume of international voice traffic exceeded 5.6 billion minutes and international short message traffic exceeded 1.8 billion.

As a **leading cloud service provider in the telecom industry**, M800 Limited mainly provides **global telecom resource services and self-developed CINNOX omni-channel converged communication solution platform**. By giving full play to the advantages of global phone number resource allocation, global telecom network resource layout, cross-border seamless intelligent communication, data compliance protection, localized communication experience, data-driven AI technology and other aspects, M800 Limited brings **one-stop telecom solutions for enterprises under brand globalization**, which is multi-national, cross-network, cross-platform and cross-language.

# 2.3 Key Use Cases

AI Sales Bot

Omnichannel Contact Center

## General Use Case

- ❑ Lead Qualification & Forwarding
- ❑ Member Activation & Re-engagement
- ❑ Customer Escalation
- ❑ Customer Satisfaction Follow-up
- ❑ Payment Reminders
- ❑ New Follower Acquisition
- ❑ Service Notification

## Industrial Use Case

- ❑ Event, Delivery, Livestream & Class Notifications
- ❑ Financial Collection
- ❑ Credit Card Due Reminders
- ❑ Insurance Renewal Reminders Product Sales Calls
- ❑ Telecom Data & Broadband Promotions
- ❑ Epidemiological Surveys by Health or Community Authorities
- ❑ In-store Invitations: Auto, Real Estate & Education

## 2.4 Core Advantages

### Technological Leadership

- Seamless AI-powered interaction
- Advanced large-model integration
- Massive computing clusters for ultra-high concurrency

### Deep Partnership

- Helping clients build ROI analysis models to ensure better returns than traditional approaches
- Proprietary 12 Conversion Techniques for 2–4× faster performance growth

### White-Glove Service

- Years of hands-on experts offering end-to-end "Haidilao-style" support
- Exclusive 4+1 Golden Script Framework—helping teams master top-tier sales conversations with ease

### One Stop Solution

- One solution to solve telecom resources, infrastructure, and software problems, improving internal procurement efficiency and after service communication.

# 4.3 Case Study: AI Sales Boost

Hotel

## US Listed Education Company

**Problem:**
To increase the conversion of prospect target audience. (New Customer)

**Summary:**
- Precision Data Cleansing Guidance
- Outbound Call Connection Optimization
- Conversational Script Design
- Manual Quality Inspection

| | | | | |
|---|---|---|---|---|
| Data Cleansing - > | AI Script Creation -> | AI Make Calls -> | Manual Quality Review -> | Summary & Optimization |

| AI Concurrent | Connected Rate | Positive Intention | Daily Lead Qualified |
|---|---|---|---|
| 100 Calls / Seconds | 32% | 5% | ~ 1200 ppl |

## Listed Fin-Tech Company

**Problem:**
To increase the repeat of loan activation. (Customer Retention)

**Summary:**
- AI-Human Cooperation
- Conversational Script Design
- Business Process Design
- Follow-up SMS

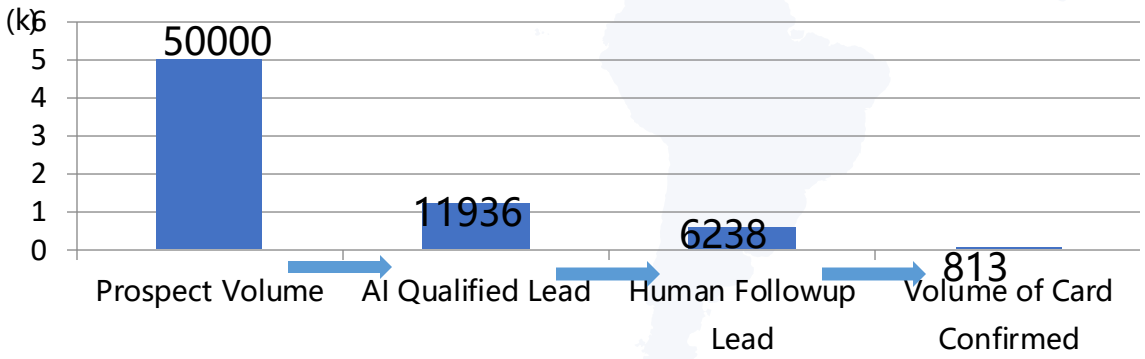
| | | | | |
|---|---|---|---|---|
| Process Design - > | AI Script Creation -> | AI Make Calls w/ SMS -> | Manual Quality Review -> | Summary & Optimization |

| 20 | Agent Accounts | Connected Rate | Daily Load Issued |
|---|---|---|---|
| 130 Calls / Seconds | 60 ppl | 20% | 900+ Cases |

Hotel

## Credit Card Sales (New) & Payment Due (Retention)

- **Using AI robots for lead screening, 79% of invalid users were removed**, significantly reducing manpower costs and boosting outbound center efficiency.
- **After AI-based classification, Class A clients achieved a 56% conversion rate**, demonstrating the precision and effectiveness of the predictive model.
- **Intelligent voice robots efficiently identify high-intent leads**; combined with human outbound calls, agents can engage more targeted users, significantly increasing per-agent productivity.



| Customer | AI Outbound Made | Total Collection Assisted by AI | Commission Expense | Operating Cost | Net Profit | Agent Account |
|---|---|---|---|---|---|---|

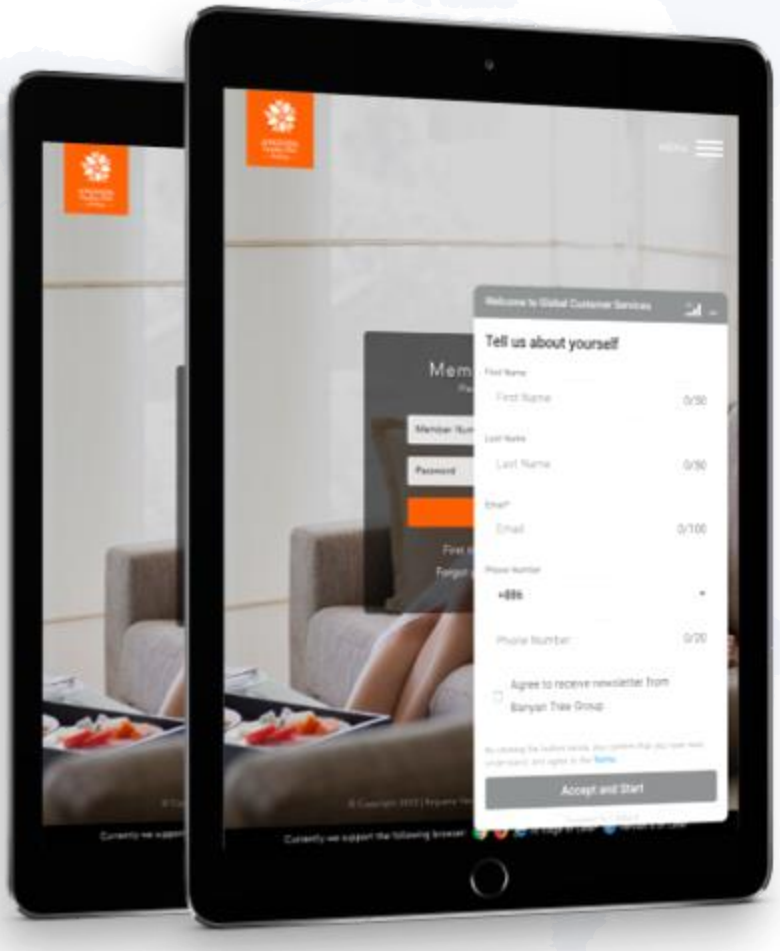
# 4.6 Case Study: All-in-one Solution

Hotel



**Over the past 30 years, Banyan Tree has built 10 world-renowned brands, operating more than 60 hotels/resorts in more than 20 countries, with a total of more than 8,000 rooms and dozens of spas. In addition, dozens of new hotels, resorts, spa centers, etc., are under construction.**

## Challenge

- Complex business and brand lines that present user experience challenges.
- Hotels in many regions of the world need to deal with complex telecom regulations and phone setups; the need for multi-language support has led to the need to set up offices and recruit talent in different regions.
- Challenges posed by operations management, customer data silos, and information fragmentation.

## Solution

- M800 Group provides an integrated solution to support Banyan Tree customers to call CINNOX local numbers to connect multiple countries around the world. Omnichannel contact center CINNOX 's integrated features, such as web widgets, live chat, web calling, etc., enable one service station to support online services for multiple brand websites; Customized AI agents for each brand reduce the investment of human resources and boost customer service efficiency; the ability to label contact profiles and customer inquiries helps easy management and monitoring.
